BES&T PRESIDENT/CEO INVITED TO THE WHITE HOUSE

BES&T CEO, Michael Boyle outside the White House

WASHINGTON D.C., August 23, 2012 – BES&T is honored and proud to announce that President/CEO, Michael Boyle has been invited to join the U.S. EX-IM Bank at the White House on Thursday, August 23, 2012. Mr. Boyle recently met with the EX-IM Bank Chairman, Mr. Fred Hochberg at BES&T Headquarters in Manchester, NH to provide insights on small businesses in New Hampshire and also to discuss the future of exporting in America and what small businesses such as BES&T can do to get in the game. “I am honored and very proud to represent you the men and women of the Boyle Energy Services & Technology, Corporation in Washington D.C. at the Whitehouse on Thursday august 23rd”, said Mr. Boyle. This invitation is as a result of the strategic relationship that BES&T has had over the years with the U.S. EX-IM Bank which has supported and sustained the global growth

strategy of the company to date.

“As you know, our very positive, and to date profitable, relationship with Bank of America and the Export Import Bank of the United States has greatly supported our efforts to grow this company at the strong rate we have achieved. I have most recently met with the Chairman of the EXIM bank in our office in Manchester and had the privilege to offer insight on small business interface with the bank to grow exports. I can only hope my presence is in some way useful to the competitiveness of the U.S. worldwide, its government and the Export Import Bank of the United States. Our mission is strong and our strategy sound. Thank you for your hard work and years of support”.

A recent Harvard Business School graduate, Mr. Boyle founded BES&T in 1990. After serving in the Navy, Michael utilized the skills gained in his Naval training to provide pre-commissioning services to the power industry, a service previously performed only by the construction companies themselves. He was one of the first to pioneer the pre-commission cleaning services industry in the United States, and BES&T is now an internationally recognized leader in the industry.
