

BOYLE ENERGY SERVICES & TECHNOLOGY ADDS COMMUNICATIONS TO SENIOR MANAGEMENT

Continued Growth in International Market for Local Company

MANCHESTER, N.H., February 24, 2015 – Boyle Energy Services and Technology has handpicked Pamela Schmuhl earlier this month as the new Communications Director for their international marketing and public relations needs. Schmuhl comes to Boyle Energy Services and Technology with an expansive degree of marketing-communications experience, including Fortune 100 companies such as FedEx and General Electric.

“We are pleased to have Ms. Schmuhl join the team,” said CEO Mike Boyle. “She brings more than 20-years of marketing-communications experience to Boyle Energy, positioning the company for the next phase of international growth and development.”

Schmuhl brings to Boyle Energy Services and Technology (BES&T) a long list of both international and energy-specific account experience, allowing for a comprehensive understanding of the markets and strategic demands of launching a technologically innovative business on a global scale. As Communications Director, Schmuhl will implement internal communications support services and trainings, and external marketing campaigns, as well as be a strong addition to the senior management team at BES&T.

“Pamela brings a wealth of knowledge that will add momentum and trajectory to Boyle Energy’s strategic plan for growth in global plant commissioning,” Vice President of Global Business Development Michael McCarthy said.

As an industry leader in energy commissioning, BES&T has blazed a new path through innovative proprietary technology, redefining the customer experience and project successes. Schmuhl’s communications skills across the energy industry as well as for start-up technologies and companies will bring BES&T to the next level of the import-export arena in New Hampshire, and the next level of business growth in the energy industry.

Founded in 1993, and from its New Hampshire headquarters, Boyle Energy Services & Technology is a technological leader in international plant commissioning, offering the highest standard of projects to EPCs, OEMs, and owners. Having moved to New Hampshire seven-years ago, Schmuhl calls Newfields home and volunteers with local non-profits.

ABOUT BOYLE ENERGY SERVICES & TECHNOLOGY

Boyle Energy Services & Technology (BES&T) is an international leader in power plant commissioning, offering the highest standards of professional project management and flexible implementation in the construction of concentrated solar thermal, bio mass and refinery facilities.
